The first of these is the fact that the
 system is not a simple one, but a
 complex one, involving many factors
 which are not yet fully understood.
 The second is that the system is not
 a static one, but a dynamic one,
 which is constantly changing and
 evolving. The third is that the
 system is not a closed one, but an
 open one, which is constantly
 interacting with the environment.
 The fourth is that the system is not
 a linear one, but a non-linear one,
 which is characterized by feedback
 loops and other non-linear
 interactions. The fifth is that the
 system is not a deterministic one,
 but a probabilistic one, which is
 characterized by uncertainty and
 risk. The sixth is that the system
 is not a single one, but a multi-
 scale one, which involves interactions
 at different levels of organization.
 The seventh is that the system is not
 a simple one, but a complex one,
 which is characterized by many
 interacting components. The eighth
 is that the system is not a static
 one, but a dynamic one, which is
 constantly changing and evolving.
 The ninth is that the system is not
 a closed one, but an open one, which
 is constantly interacting with the
 environment. The tenth is that the
 system is not a linear one, but a
 non-linear one, which is characterized
 by feedback loops and other non-
 linear interactions. The eleventh is
